PIANURA

Our new **PIANURA** collection evokes vast, open landscapes, revealing the gentle undulation of the earth, soothing the gaze. Inspired by notions of softness and protection, it unveils the inherent sophistication of textile fibres.

At the heart of this collection lies the art of textile warps, our signature technique, rooted in exceptional craftsmanship and refined over decades. **PIANURA** is the purest expression of our emblematic expertise, patiently developed over time.

The richness and delicate effects of textile warps are expressed through a palette of warm, enveloping tones, enhanced by cooler shades to create a harmonious balance. Graphic elements reminiscent of animal coats and plumage evoke an instinctive sense of protection, while more abstract compositions dissolve into softly blended hues, echoing the poetry of misty landscapes.
