WHISPER

Inspired by the world of minerals, **WHISPER** reveals the raw beauty of natural elements through an elevated expression of craftsmanship.

Like a veil of subtle reflections, delicately dusted elements interact with light through pearlescent, sandy and faceted finishes. The designs draw inspiration from marble striations and the fine veining of stone, evoking mineral-inspired landscapes that feel both structured and dynamic.

The collection captures a nearly imperceptible gesture: a whisper of material, a delicate trace, and a refined sense of lightness.
